

Hand-y Root Deers

Materials Needed:

- Root beer (can, glass bottle, or 2-liter bottle)
- Brown construction paper
- Tan construction paper
- 2 craft eyes, 1-inch
- 1 pompom - black or red, 1-inch
- Scissors
- Glue Stick

It's time to create your root deers!

Step 1 – Create the head by placing your foot (with a shoe on) on the edge of the brown construction paper. Trace and cut out. Use the remaining brown paper to trace and cut out two ears – see template below - and a ½-inch wide strip to fit around the circumference of the can or bottle.

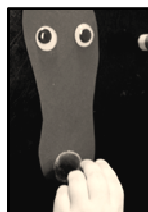

Step 2 – On tan construction paper, trace both of your hands and cut out.

Step 3 – Glue the ears to the toe-end of the traced shoe. Then glue the hands to the ears to create the antlers.

Step 4 – Turn the head over and glue the eyes to the middle of the head and the pompom to the bottom of the head for the nose.

Step 5 – Place the strap around the root beer to test the length. Glue the strap just under the antlers as seen in the picture. Allow glue to dry. Then place over the root beer.

Step 6 – Print the gift tags – see below and personalize.
